

Exploring Customer Engagement & Purchasing Patterns in E-Commerce

DATA 200 – Applied Statistical Analysis

Problem Statement

Unpacking the Different Elements
of Customer Journey Mapping

Engagement & Purchasing

How does customer engagement directly influence purchasing behavior?

Buyers vs. Browsers

What differentiates customers who buy from those who merely browse?

Critical Actions

Which specific customer actions are most predictive of a completed purchase?

Our Data Source: Real-World E-Commerce Activity

E-Commerce Behavior Data

Comprehensive dataset capturing a wide range of online customer interactions.

Authentic Online Shopping Data

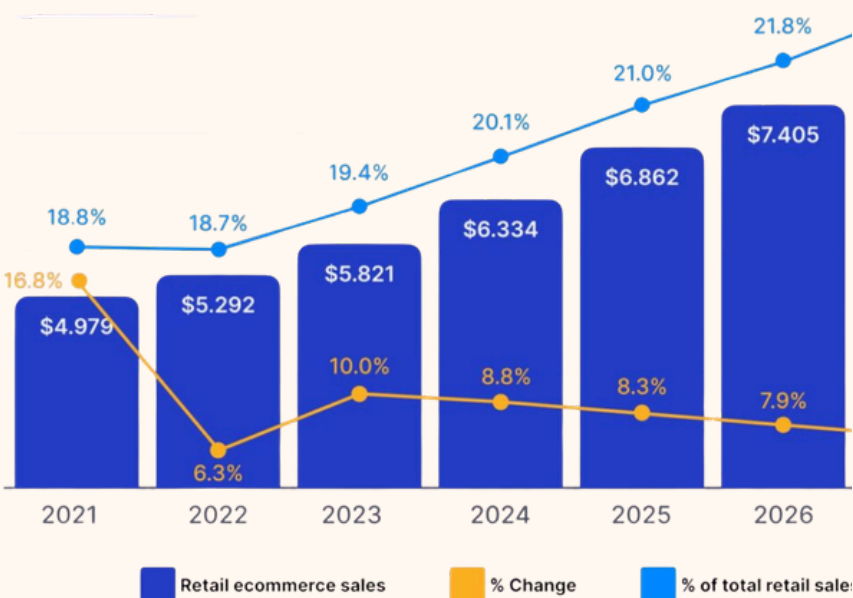

Insights derived from genuine, anonymised user activities on e-commerce platforms.

Kaggle Sourced

Reliable and publicly available dataset from a leading data science community.

Activity & Purchase Details

Includes detailed logs of customer navigation, product views, cart additions, and final purchases.

Project Plan

Perform exploratory data analysis (EDA)

Apply statistical models (Regression, Logistic Regression)

Build a simple Python application
